

VALENTINE MOUSE

WHAT YOU NEED:

Construction Paper

Scissors

Glue

Yarn

Small Pom-Pom

Marker

To make a Valentine mouse, fold a piece of colored construction paper in half. Beginning and ending at the fold, cut out one half of a heart shape. Open the half heart to reveal a full heart.

Fold the heart again and look at it. The point will be the nose of the mouse.

Open the heart and apply glue in the fold beginning in the center and moving away from the point. Cut a long piece of yarn and place it into the glue so that long piece sticks out. This is the mouse's tail.

Apply glue around the edges of the heart and fold again to stick together.

Add a nose to the tip of mouse. You can use a pom-pom or even a small heart shape, or just use marker and draw the nose on.

Next, cut hearts for the ears and attach them to each side of the mouse.

Finally, cut smaller hearts for the eyes and attach them to each side of the mouse.

You now have a Valentine mouse!
