

PAPER PLATE FLOWER

To make a paper plate flower, you will need a small (dessert sized) paper plate.

Paint the paper plate the color that you would like the center of your flower to be.

Next, decide what color you would like the petals of your flower to be, and cut out several petals using the shape on the next page. Sturdier paper is recommended.

When your plate has dried, place it on the table in front of you with the painted side facing down.

Glue the petals of the flower to the back of the plate moving around the edge in a circle. When you have gone all the way around the plate, turn it back over and admire the beautiful flower that you have made.
