

FALL SQUIRREL

Collect some brightly colored autumn leaves. Color and cut out the squirrel and glue it onto a piece of colored construction paper. Decorate its tail by gluing on the leaves you collected. If you don't have autumn leaves outside, you could make your own or just use pieces of tissue paper in bright fall colors.

The world outside is full of learning opportunities. Collect more leaves and sort them into piles by color. Collect acorns and sort them into piles by size or into piles of acorns with covers and without. Collect stones and sort them by size or arrange them in order from smallest to largest.
