

MUFFIN CUP DAFFODILS

To make muffin cup daffodils, cut out the attached flower shape from yellow construction paper. Cut the leaves from green paper. Also cut a stem from green paper.

Choose a piece of paper to use as your background paper.

Glue your stem to the lower center of your paper.

Glue the leaves to the stem.

Next glue the flower shape to the top of the stem, overlapping it slightly.

Now find a yellow muffin cup and glue it to the center of the flower shape.

Scrunch up a piece of orange tissue paper and glue into the center of the muffin cup. You could also use orange pom-poms.

If you wish, you could cut a strip of paper to look like grass and glue across the bottom of your paper.
