

## SPRING TREE

To make a spring tree, choose a colored piece of paper to be your background.

Paint your hand and arm brown and press it firmly down on your paper with your fingers spread out.

In the spring, many trees have fluffy looking flowers that are pink or white all over their branches.

The print of your arm is the tree trunk, and your fingers are the branches.

Using small pieces of sponge, or even your fingers, cover the branches of your tree with fluffy little flowers.

An alternative would be to glue tiny pom-poms or pieces of popped corn onto the tree.
